Tech skills: Java, JavaScript, SpringBoot, Vue.js, MySQL, Oracle, MongoDB, RabbitMQ, Redis, Jenkins, Docker, SVN

Covestro   Mar 2023 - Jun 2023
IT Intern   *Shanghai, China*
Developed 2 low-code applications for the company.
Visualized cost savings generated by the Suggestion System application using Microsoft Power BI.
Collaborate with colleagues to deliver and operate the application.
Tech skills: Power BI, PowerApps, HTML, CSS

PROJECT

Food Delivery App DevSecOps Project [Github](#)   Jul 2024
Developed a full-stack food delivery application using Node.js, React.js, and MongoDB.
Enabled customers to browse and order food directly through a user-friendly web interface.
Provided the company with tools to manage orders and control menu visibility on the platform.
Ensured application security and quality through Trivy and SonarQube.
Built Docker images of the app and pushed them to Docker Hub for deployment. Automated the CI/CD pipeline using Jenkins.
Deployed Prometheus and Grafana on AWS EC2 instances to monitor the status of the Jenkins server.
Created Kubernetes cluster by using AWS EKS. Deployed the application on the Kubernetes clusters.
Tech skills: Git, Node.js, React.js, AWS, Jenkins, Trivy, SonarQube, Kubernetes

Chat App [Github](#)   May 2024
Developed an real-time chat application using the MERN stack (MongoDB, Express.js, React, Node.js).
Implemented real-time messaging functionality using Socket.io, enhancing user interaction and communication within the application.
Developed real-time online user status features using Socket.io and React Context, providing dynamic updates.
Tech skills: React.js, Node.js, MongoDB, Express.js, Socket.io
